### **EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Regarding independent claim 10, the prior art of record does not disclose or reasonably suggest the combination of audio circuitry to convert input audio signals from analog to digital format and processing both input audio signals and output audio signals using signal processing techniques based upon proximity data. *Hawker et al.* ('949) is the closest prior art of record, disclosing processing an output level of an audio device by adjusting the volume of a telephone to make it louder when it is in a handsfree mode. However, *Hawker et al.* ('949) omits circuitry for converting audio signals from analog to digital format, and wherein a processor processes both input audio signal and output audio signals based upon proximity data. While it is known to convert analog audio signals into a digital format for processing, there is no reasonable suggestion from the prior art of also processing an input audio signal based upon proximity data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
